

Api Document

1. url: https://app.crewgo.co/partner/api/get_staff

options: (optionals)
id {numeric}
active {0,1}
email_verified {0,1}
search {name, email, phone, skill name, skill level}
order_by_column {col_name}
order_by_value {asc, desc}
limit default for all records
start {numeric}
length {numeric}
entered_by {numeric}

Description: when you will hit the API call without giving any option or variable, it will return all staff from crew database. When you will post any above parameter along with the api url, it will return the filtered data according to the posted parameters.

Response:

```

entered_by {numeric}

Description: when you will hit the API call without giving any option or variable, it will return all customers from crew database. When you will post any above parameter along with the api url, it will return the filtered data according to the posted parameters.

Response:

```
{ "totalRecords": 91, "customers": [{"id": "21", "first_name": "Qa", "last_name": "Ebpearls", "name": "Qa Ebpearls", "email": "bikramkc.kc@gmail.com", "password": "$2y$10$WFQ5RuQEx6C1TvomVkJFr.ftOVyOVVLAKd2zeUHRbeLGTqkyKzBulG", "phone_number": "0412345678", "full_address": "6722 Princes Highway, Tyrendarra, Victoria, Australia", "street": null, "postcode_id": null, "profile_image": "717faae5d4075c683554449943a50a5a.png", "cover_image": null, "description": "test", "email_verified": "1", "active": "1", "login_from": "APP", "forgotten_password_code": null, "inactivated_date": "0000-00-00 00:00:00", "entered_date": "2018-01-19 17:31:18", "updated_date": "2017-11-22 05:15:15", "last_login": "1514866022", "username": "be4961fca4b54a6d97f6b0eb529f7ef29684eba2", "ip_address": "202.166.217.114", "salt": null, "activation_code": "", "forgotten_password_time": null, "remember_code": null, "facebook_id": "0", "google_id": "0", "customer_user_id": "0", "register_from": "APP", "lhc_user_id": "0", "created_on": "0000-00-00 00:00:00", "timezone": "Australia\\Melbourne", "offset": "+10:00", "last_tc_accepted_date": "2017-12-26 11:41:11", "entered_by": "1111", "pin_code": "1111", "has_new_job_alert": "0", "skip_add_credit_card": "0", "skip_generate_quote": "0", "status": "1"}]]}
```

4. Invoice api call is directly integrated into the system (creates an Invoice in Xero when CrewGo Partner. Portal creates a Booking Confirmation). For using externally, I have mentioned another same API which have dummy temporary data to post to create an invoice in Xero. You can find that api below in the last.

5. <https://app.crewgo.co/partner/api/getcalendar>
Type: POST

Parameters: (optionals)

startDate {Y-m-d H:i:s}

endDate {Y-m-d H:i:s}

Description: when you will hit the API call without giving any option or variable, it will return a url of .ics file which will have all events or job timings from crew database. When you will post any above parameter along with the api url, it will return the filtered data in the .ics file according to the posted parameters.

Response:

```
{"url":"http://localhost/3rdparty/partner/googleCalendar.ics"}
```

6. https://app.crewgo.co/partner/api/post_xero_staff

Type: GET

Parameters: (Required)

Name {string}

EmailAddress {email}

SkypeUserName {string}

Parameters: (Optional)

FirstName {string}

LastName {string}

Addresses {string}

Phones {string}

IsSupplier {bool true/false}

IsCustomer {bool true/false}

Description: when you will hit the API call along with these parameters in get request, you will see the contact create on Xero application. If you

Response:

```
{"status":"success","message":"1 contact created/updated in this Xero organisation."}
```

7. https://app.crewgo.co/partner/api/post_invoice_xero

Type: POST

Data should be in xml format like

```
<Invoices>
```

```
  <Invoice>
```

```
    <Type>ACCREC</Type>
```

```
    <Contact>
```

```
      <Name>Abdul Rehman</Name>
```

```
    </Contact>
```

```
    <Date>2013-05-13T00:00:00</Date>
```

```
    <DueDate>2013-05-20T00:00:00</DueDate>
```

```
    <LineAmountTypes>Exclusive</LineAmountTypes>
```

```
    <LineItems>
```

```
      <LineItem>
```

```
        <Description>Monthly rental for property at 56a Wilkins Avenue</Description>
```

```
        <Quantity>4.3400</Quantity>
```

```
        <UnitAmount>395.00</UnitAmount>
```

```
        <AccountCode>200</AccountCode>
```

```
      </LineItem>
```

```
    </LineItems>
```

```
  </Invoice>
```

```
</Invoices>
```

Response:

```
{"status":"success","message":"1 invoice created in this Xero organisation."}
```
